# Hydrogen Peroxide Atomizer
# Model : BYIHPS

## Product Advantages

- This self-contained, ergonomic device is lightweight and highly portable, making it easy to move between facilities. It utilizes an innovative cold evaporation system to create ultra-fine aerosol droplets for even distribution in smaller spaces.
- The unit offers dual-mode control via a touch screen or remote. It features an automated disinfection process with intelligent matching for temperature and humidity, alongside dynamic management that alerts users to low disinfectant levels.
- The system can effectively sterilize up to 200 $m^3$ across multiple rooms, operating with an economical minimum dosage of just 8ml/$m^3$ of H2O2 disinfectant.
- By using an 8% concentration of hydrogen peroxide, the device bypasses "dangerous chemicals" regulatory hurdles. It is highly compatible with various materials and poses no risk to electronic appliances or surfaces.
- The device requires no specialized dehumidification and has minimal environmental requirements, allowing a full decontamination cycle—from application to residue clearance—to be completed in under 90 minutes.

## Specification

| | | |
|---|---|---|
| Weight | : | 8 kg |
| Movement | : | Portable |
| H2O2 | : | 8%, 500ml |
| Decontamination | : | ≤ 200m3 |
| Power | : | 110v/230V, 1.1 kw |
| Dimension(WxHxD) | : | 45 x 35 x 38 cm |
