H1850 Benchtop High Speed Centrifuge

H1850 Benchtop High Speed Centrifuge

15 rotors and many kinds of adapters are available for H1850. 6x50ml(round/conical) are widely used among them.It has high speed rotor (18500rpm)and high capacity rotor(4x100ml).The special wind deflector can keep the sample in a good state,and the damping system can reduce noise, ensure stable operation.

Product advantages

- Equipped with 7-inch full touch screen simple interface and all parameters at a glance. Stepless speed adjustment, automatic conversion of centrifugal force, display on the same screen.
- multiple program memories .users can simply name each programs, which is more convenient to call programs when using.
- Automatic identification system for 15 magnetic rotors. It has 12x1.5/2ml angle rotor(Max speed: 18500rpm), as well as 4x100ml swing rotor(different adapters available).
- 10 individual acceleration and 11 deceleration stages, and free parking time can be set.
- Providing multiple self-diagnostic protection functions against door interlock malfunction, over-speed operation, motor
- overheating, misoperation and communication fault etc. to ensure user's safety.
